Cal State Fullerton

Social Understanding in Autism

Do you:
• Have a child between 5 and 10 years old, diagnosed with an Autism Spectrum Disorder (ASD)?
• Want to help researchers understand how children with autism develop ways of thinking about friends and social interaction?
• Want to better understand your child’s language skills?

Participation includes a parent-child research visit, child assessments, and parent questionnaires.

Families are compensated $30 for their time, and receive a report from a standardized language assessment of their child (the CELF)

Contact Dr. Rachel Fenning: 657-278-7802 or rfenning@fullerton.edu
Principal Investigators are Dr. Fenning and Dr. Jason Baker. This study is conducted through the Dept. of Child & Adolescent Studies in the College of Health & Human Development.
